

Engineer

We are an engineering office in Stralsund that has been working mainly in the fields of hydraulic engineering, structural engineering, infrastructure, environmental and landfill construction, earthworks and foundation engineering, structural planning, geotechnics and technical equipment since 1997. We need reinforcements for our office. Perhaps this publication is a good opportunity to get to know each other and come together?

Tasks:

- Planning and supervision of construction activities most in Mecklenburg-Vorpommern

Our Offer:

- Working independently within a well-practised project team
- Continuous training/education
- Pleasant working atmosphere
- Promotion prospects

Our Desires:

- Completed, diversified university education
- Capacity for teamwork
- Confident knowledge of German (B2)
- Driver's license

We look forward to receiving your application.
